BERKELEY CREDENTIALS

BUILT *for a* MORE SUSTAINABLE FUTURE

Designed for Life

At the Berkeley Group, we are committed to creating great places where people love to live, work and relax. Where the homes are lightfilled, adaptable and finished to very high standards. Where carefully planned public areas enhance wellbeing and quality of life for residents and visitors. Where people feel a sense of community.

CUSTOMERS DRIVE ALL OUR DECISIONS

We put our customers at the heart of everything we do. First, we strive to understand what our customers want and need – well-built homes, in a pleasant and safe neighbourhood, with plenty of amenities and good transport connections. Then we apply that understanding to all our planning and design decisions. For every new development, we challenge ourselves to go further, to improve and innovate, ensuring we satisfy the real needs of our customers in inspiring and sustainable ways.

QUALITY FIRST TO LAST

Quality is the defining characteristic of Berkeley Group developments, right down to the very last detail. We choose our locations, style of homes, construction practices, materials and specifications with great care. When you buy a new home from Berkeley Group you can be safe in the knowledge that it is built to high standards of design and quality, has low environmental impact and that you will receive a professional, efficient and helpful service from us. For extra peace of mind, all new properties come with a 10-year build warranty.

Berkeley complies with the Consumer Code for Home Builders which ensures that home buyers are treated fairly, know what service levels to expect, are given reliable information upon which to make their decision and know how to access fast, low-cost dispute resolution arrangements if they are dissatisfied.

CHOICE & DIVERSITY

No two Berkeley Group customers are the same, so we aim to offer a wide choice of property location, size and type. From Central London to major towns and cities; from market towns to rural villages, the countryside to the coast – we build in locations our customers love. Whatever home you are looking for, whether that's a city penthouse, a modern studio apartment or traditional family home, you will find the perfect fit for your lifestyle.

COMMITMENT TO THE FUTURE

When we plan a development, we take a long-term view of how the community we create can thrive in years to come. Our aim is to permanently enhance the neighbourhoods in which they are located, through intelligent design, quality landscaping, sympathetic architecture or restoration and high standards of sustainability. We don't just build for today; we build for the future too.

ENVIRONMENTALLY FRIENDLY

We are committed to creating a better environment within our developments and in the areas that surround them. That's why we build on brownfield sites whenever we can, bringing new life to disused and unloved spaces. We take care to protect the natural environment and enhance biodiversity. All our homes are designed to reduce water and energy consumption, promote recycling and enable residents to choose sustainable transport options.

Sustainability is fundamental to Berkeley's ethos. We are committed to supporting the long-term health, wellbeing and prosperity of people and the planet, while minimising the environmental impact of how we create homes and communities.

WASTE & RECYCLING

We actively encourage residents to reduce waste wherever possible. Alongside external recycling facilities, integrated kitchen recycling bins make it easy to separate and recycle household waste.

NATURE & BIODIVERSITY

Parkland, trees and landscapes are central to a thriving environment. As part of our commitment to biodiversity, Sutton Garden Square includes habitats that encourage wildlife to flourish and connect residents with nature.

FUTURE-PROOF DESIGN

From the early stages of design, we consider how our homes will respond to the future effects of climate change, including higher temperatures and extreme weather. We continually research ways to make our homes and developments more resilient for the future.

CLEAN AIR

It is hard to avoid polluted air, particularly in towns and cities. Throughout Sutton Garden Square, planting helps create a cleaner environment, while mechanical ventilation within the homes helps filter internal air.

NOISE REDUCTION

We can't eliminate noise, but we carefully consider its impact in the design of our homes. Measures are incorporated to reduce both external and internal noise where possible, to create a quieter environment.

SUSTAINABLE TRANSPORT

Sutton Garden Square is well connected, with Sutton station just a four-minute walk away. Secure cycle parking and car charging points encourage sustainable travel and help reduce air pollution and support healthier lifestyles.

ENERGY EFFICIENCY

Efficient energy use helps reduce both fuel bills and carbon emissions. Our homes are designed to be more energy efficient than standard homes, with enhanced insulation, airtight construction, energy-efficient heat pumps, MVHR systems, low-energy lighting, and high-performance kitchen appliances.

STEWARDSHIP

Maintaining communal spaces and facilities for the long term is an important benefit to the community. We work with managing agents and residents to keep the development in pristine condition.

WATER EFFICIENCY

Our homes are designed to high water efficiency standards, with dual flush WCs and low-flow taps and shower heads that reduce water use without compromising comfort. Rainwater harvesting is also used to support gardens and landscaped areas.

SUSTAINABLE MATERIALS

We are committed to sourcing construction materials sustainably and responsibly. Timber and wood-based products used in your home are certified by FSC or PEFC schemes, ensuring they come from responsibly managed forests. We also focus on reducing embodied carbon by sourcing low-carbon and recycled materials wherever possible.
